

# Modular Offices by INPLANT OFFICES, inc.

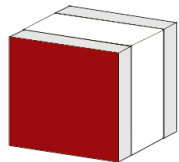

Benefits of Modular Construction

## Modular vs. Stick-Built:

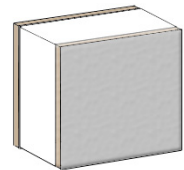

### Save Time:

Modular Offices are installed in less than half the time it takes for stick-construction. TIME IS MONEY!

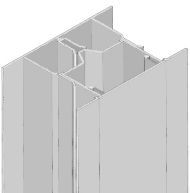

### Stay Flexible:

Modular Offices can be reconfigured easily at any time. Inplant Offices' wall systems are NON-PROGRESSIVE which means individual panels can be removed or replaced without having to remove any other panels or ceiling.

### Save Money:

Modular Offices are fully functioning pre-engineered buildings with doors, windows, and electrical components. Yet, they are considered CAPITAL EQUIPMENT for tax purposes. Which means it depreciates over 7 years versus 39 years for conventional construction. Also, modular construction eliminates the need for most of the multiple trades/subcontractors. One Installer does the majority of the work!

### Stay on Schedule:

From Concept to Completion in 3-4 weeks! No subcontractor delays. Construction is 80% complete upon arrival.

## Why INPLANT OFFICES:

### Knowledge and Experience:

The majority of our team has more than 25 years in the Industry

### We do it right the first time:

Our facility is located underground in a limestone quarry. This makes controlling temperature and humidity easier which helps us maintain the quality of our products.

Our engineering staff uses the latest versions of CAD software so your project is fabricated how you envisioned with the options that you need.

### No job is too small or too large:

From an 8' x 8' shipping office to 100,000 sq ft of office space, we can provide the right product and the right service on time and on schedule.

Think outside the Beige Box...
